- a. The purpose of this modification is to establish the terms and conditions under which the contractor will provide the disposal of low level radioactive debris at soil disposal prices as specified in the basic contract; to revise the terms and conditions of the contract to reflect the current conditions specified in the contractor's applicable licenses and permits, and; to incorporate revised terms and conditions that reflect the negotiated agreement of the parties for contract years 3, 4, 5, and 6. The changes contained herein relating to contract years 4, 5, and 6 are applicable to option period one. Nothing contained herein shall be construed as an exercise of the government's unilateral option to extend the period of performance as specified in Article 2, OPTIONS TO EXTEND THE TERM OF THE CONTRACT.
- b. Terms and conditions for the disposal of debris at soil disposal prices are as follows.

1. Contract line items 0011, 0012, 0013, and 0014 are hereby established as follows:

Price Schedule Applicable for the Period of Performance June 30, 1999 through June 29, 2000

19. Item	20. Mode of Delivery	21. Estimated Quantity	22. Unit	23. Unit Price
0011	Debris Disposal at Soil Disposal Price by Lined Railcar, Including Bulk Container by Rail.	Included in Contract Line Item 0005.	Cubic Yard	\$134.92
0012	Debris Disposal at Soil Disposal Price by Lined Truck or Disposable Bags by Truck, Including Lined Bulk Container By Truck	Included in Contract Line Item 0005	Cubic Yard	\$134.71
0013	Debris Disposal at Soil Disposal Price by Lined Container by Railcar.	Included in Contract Line Item 0005.	Cubic Yard	\$163.58
0014	Debris Disposal at Soil Disposal Price by Lined Container by Truck.	Included in Contract Line Item 0005.	Cubic Yard	\$160.40

- 2. As a condition of receiving the disposal price as specified in items 0011 through 0014, the Government will:
- a. Ensure that debris to be disposed of at soil disposal prices arrives at the contractor's Clive, Utah disposal facility between one (1) and seven (7) calendar days prior to the arrival of a Fernald unit train. Failure to comply with this requirement will result in the debris delivered under items 0011 through 0014 being disposed of by the contractor and invoiced at the debris disposal price specified under line item 0005 of the contract;
- b. Identify shipments of debris under line items 0011 through 0014 on Envirocare Form EC-98096 (5-Working-Day Advanced Shipment Notification Form). This identification will be provided in the comments section of Envirocare Form 98096 and will include, as a minimum, the shipment number(s) and applicable line item number for disposal of debris at soil prices, and; the volume of debris identified shall not exceed 10% of the volume of waste delivered by the Fernald unit train.
- c. Assume all responsibility for coordinating the arrival of shipments to comply with the schedule conditions specified in paragraph 3.a. above.

- d. Oversize debris as defined by condition 55 of Envirocare's Radioactive Material License shall not qualify for shipment under these line items 0011 through 0014.
- 3. For purposes of calculating the contractor's obligation under Article 6, RECEIPT, OFFLOAD FOR DISPOSAL, AND RELEASE FOR RETURN, of the contract, shipments made under line items 0011 through 0014 will be considered to be first received for disposal on the date the Fernald unit train arrives at the contractor's Clive, Utah disposal facility. The Government shall be responsible for demurrage based upon the date of actual delivery to the facility and the date considered first received.
- 4. Line items 0011 through 0014 shall only be valid from May 25, 2000, through November 30, 2000. The Government and Contractor may agree to extend line items 0011 through 0014 beyond November 30, 2000 upon the Government and Contractor entering into a written amendment extending the time and price applicable to such extension.
- 5. The prices specified in line items 0011 through 0014 are not applicable if either the debris to be disposed of at soil prices or the Fernald unit train shipment is found to be in nonconformance with the contractor's applicable licenses or permits.
- c. As a result of the revision of the contractor's license precluding the treatment of waste to achieve conformance with the contractor's Waste Acceptance Criteria for level of radioactivity, contract line item 0007 is revised to read as follows:

19. Item	20. Mode of Delivery	22. Unit	23. Unit Price
0007	Waste Treatment as Required to Achieve Conformance with Applicable Waste Acceptance Criteria for Oversized Debris	Cubic Yard (CY)	\$440.63

In accordance with Condition 8, "Average concentration per container on receipt" of Envirocare's renewed Radioactive Materials License, the concentration of the Waste Material is required to meet the license limits at receipt. As a result, paragraph 12(d) of the Statement of Work is hereby deleted.

- d. For the Base Period of Performance and for all Option Periods, the method of measuring for purposes of payment is revised as follows:
 - 1. For each of the subject periods of performance delete the paragraphs that read:

Item 0002, Soil Disposal by Lined Truck, Item 0003, Soil Disposal by Lined Container by Railcar, 0004, Soil Disposal by Lined Container by Truck, and 0005, Debris Disposal (by Truck and Bulk Container Only) will be based on the average volume per conveyance calculated as follows:

Three of the first ten containers/trucks (selected at random) will be weighed to establish the average net weight per conveyance for the individual waste stream. The average net weight (exclusive of the weight of the conveyance/container) of the waste stream, in tons, will be converted to volume by dividing the number of tons by a conversion factor of 1.35. The volume derived as a result of this calculation will be used as measurement for purposes of payment for all subsequent shipments under the individual waste stream, provided, however, that the standard volume per conveyance will be subject to adjustment in the event that periodic checks indicate a variance of plus or minus 12%.

2. Substitute the following paragraphs for each deleted paragraph:

Item 0002, Soil Disposal by Lined Truck, Item 0003, Soil Disposal by Lined Container by Railcar, Item 0004, Soil Disposal by Lined Container by Truck, and Item 0005, Debris Disposal (by Truck and Bulk Container Only) will be calculated as follows:

For the purposes of payment, the volume of material per shipment shall be determined by dividing the net weight (exclusive of the weight of the conveyance/container) of the waste, in tons, by a conversion factor of 1.35 tons per cubic yard. In the event that the volume of a shipment is calculated to be less than 80% of the rated volume of the conveyance/container, then the volume for purposes of payment shall be calculated to be 80% of the rated volume of the conveyance/container. In the event that the volume of a shipment is calculated to be greater than 120% of the rated volume of the conveyance/container, then the volume for purposes of payment shall be calculated to be 120% of the rated volume of the conveyance/container.

- e. In consideration for the changes made in paragraph d. of this modification, the price schedule for the remainder of the base period and Option Period 1 is revised as follows:
 - 1. The price schedule applicable for the Period of Performance June 30, 2000 through June 29, 2001 shall be as follows:

Item	Mode of Delivery	Unit	Unit Price
0001	Soil Disposal by Lined	Cubic Yard	\$137.62
	Railcar or Disposable		
	Bulk Container by Rail		
0002	Soil Disposal by Lined	Cubic Yard	\$137.40
